

Thermal measurements - facts and artifacts

Gábor Farkas

Budapest University of Technology (BME), Dept. of
Electron Devices, and

Mentor Graphics MicReD Division,
Budapest, Hungary

An informal tutorial for the OWL type

It contains some 120 slides

A complete version can be downloaded from

<http://www.eet.bme.hu/~farkas/SEMI26>

Other useful link is

<http://www.ipes.ethz.ch/ipes/2002thermal/thermisch.html>

Moral

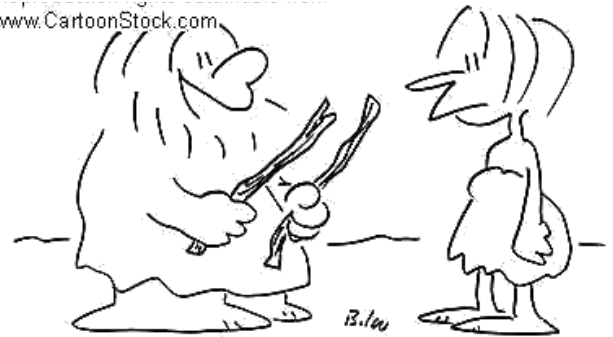

There is nothing wrong if we make some
interpolations / extrapolations

But do not sell them as facts

Let us call them “possible reconstruction”

With clear reference to the part which we know
and which we synthesize only
